VERSION FROM DRAFT RESOLUTION WITH PROPOSED CHANGES SHOWN

(Additions are underlined; deletions are identified in the sidebar notes)

7. Most water supply agencies in the State, including Metropolitan Water District of Southern California (MWDSC), are already required to collect and report routine chemical analyses to the California Department of Public Health (CDPH). MWDSC reports results of its chemical monitoring program (including east branch State Project Water to CDPH via an electronic reporting system (WriteOn)). In order to avoid redundant monitoring programs, MWDSC has offered to provide copies of these reports to the Regional Board. MWDSC's reports to CDPH provides substantially the same information that was originally specified in Table 1 of draft Order No. R8-2006-0005 (see Attachment B) and is a reasonable alternative approach;

**Deleted: its annual water quality report, characterizing State Project Water,**
